

Marco Mussetta is Full Professor of Electrical Engineering in Politecnico di Milano, Italy. He received the M.S. degree in Mechanical Engineering and the Ph.D. degree in Electrical Engineering from Politecnico di Milano, Italy, in 2003 and 2007, respectively. In 2006, he was a Visiting Ph.D. student at the State Key Lab of Millimeter Waves in Southeast University of Nanjing, China. In 2008, he was a postdoctoral research assistant at the Department of Electronics in Politecnico di Torino, Italy. In March 2011 he joined the Department of Energy, Politecnico di Milano, as Assistant Professor. Since 2022 he is the Coordinator of the Ph.D. Programme in Electrical Engineering. Since 2023 he is full professor in the same Department. His research activities include global evolutionary optimization techniques applied to antenna design, FSS, wireless sensor networks, and modelling and optimization of renewable energy systems by means of advanced neural network and fuzzy logic techniques. Since 2001, Dr. Mussetta has co-authored more than 200 publications on proceedings of international conferences and indexed journals. He is Section Editor-in-Chief of the Electronics journal (Industrial Electronics section). He is a Senior Member of IEEE, AP, CIS, PES and Past Chair of the IEEE Task Force on Fuzzy Systems in Renewable Energy and Smart Grid.
